

# Wood workshop rules

- There must be at least two people in the workshop in case accidents occur. Both people need to have completed the *electric hand tool safety course*.
- Members without a *stationary machines safety course* are not allowed to use the stationary machines.
- Only members with the *electric hand tool safety course* are allowed in the wood workshop area.
- Long sleeves, loose clothing, jewelry, and similar loose-sitting equipment are not allowed when operating rotary equipment. Either roll up your sleeves or do not use anything with sleeves.
- Safety glasses and hearing protection must be worn when a machine is in use.
- Pants covering the knees must be worn.
- Long hair should be put up when in the workshop.
- Members must use safety shoes with steel toe caps when in the workshop
- Members are not allowed to bring chemicals into the wood workshop.
- Be mindful of material use by using scrap pieces when available and possible.
- Worn-out and damaged drills and other tools should not be thrown out but instead placed in their rightful place and reported in the damage log.
- Members are not allowed to repair the machines if broken. Instead, report the damaged machine in the damage log (QR-code is in the wood workshop).
